

**-Cocoa (theobroma cacao) seed butter-** ensures that skin's hydration is "locked " in all its upper layers and helps reduce trans-epidermal water loss from deeper skin layers.

**-Sodium Hyaluronate**

- The salt form of skin-identical ingredient hyaluronic acid.
- A water binding agent that absorbs, attracts and stores moisture in enormous quantities.
- Increases hydration levels and helps strengthen skin barrier function.
- Maintains skin water content homeostasis (balance).
- Minimizes trans -epidermal water loss.
- Functions as a natural moisturizing factor that helps stabilize and maintain intercellular skin matrix (i.e., the "glue" within the skin that keeps skin cells together to avoid dry, rough texture).

**-Sodium Lactate**

- The sodium salt of natural L (+)-lactic acid. Provides intense hydration to the skin as it exhibits significant water holding capacity.
- Encourages increases cellular rejuvenation rate.
- Helps remove dead skin cells from the stratum corneum hence, further facilitates the penetration of all other high performance ingredients in this formula.

**Product name:** Prophecy Cream

**Function:** Anti-aging cream. Plumps and smoothes wrinkles. Multilayer hydration, radiance booster.

**Attributes:** Paraben- free, SLS- free, sodium chloride- free. Not tested on animals.

**Made in:** Israel

**Manufactured by:** Manufactured for H.Zingboim Cosmetics Ltd. by Y.L. & G.V. Cosmetics Ltd., 34 Ben Zion Galis St. Sgoula, Petah Tikva, Israel, 4927934.

**EU RP:** IK Center for Testing and EU European Certification - CTEC. Address: Engures 5-69, Jurmala, LV-2016, Latvia.

**To Use:** Apply morning and evening to dry skin.

**Content claim:** 50 ml, 1.69 fl. oz. U.S.

PAO: + 24 Month

**\*(1) Novel small sized hyaluronic acid with enhanced therapeutic properties**

Prof. **Rachel Lubart** (Ph.D), Prof. **Aharon Gedanken** (Ph.D), Prof. **Dror Fixler** (Ph.D), Dr. **Anat Lipovsky** (Ph.D) and **Yariv Inbar**.

# PROPHECY CREAM

Game - changing skincare

### CAUSES:

#### Decline or Initial Signs of Decline in Skin's

- Volume and Hydration Levels Both in Epidermal and Dermal Layers
- Immunity Biological Responses
- Cellular Renewal Rate
- Firmness and Elasticity Levels

### SYMPTOMS:

- Fine Lines
- Medium to Deep Wrinkles
- Sagging Skin
- Dry Thinning Skin

## PROPHECY CREAM

### HAVA ZINGBOIM SOLUTION:

*Prophecy Cream* is a breakthrough intensely hydrating and rejuvenating facial cream that effectively prevents and reverses the clinical manifestations of aging skin.

It is based on scientifically proven multi-sized micronized hyaluronic acid molecules that penetrate deeply into ALL skin layers. It ensures enhanced therapeutic benefits more than any other hyaluronic acid based product known in the international cosmetic industry today. *Prophecy Cream* is based on a trailblazing scientific research conducted by the Chemistry Department and Faculty of Engineering at Bar- Ilan University \*(1).

**HAVA ZINGBOIM**  
cosmeceuticals

## FORMULA BENEFITS AND UNIQUENESS

### THE CHALLENGE:

Cosmetic manufacturers still face unresolved challenges in regards to HA molecules which

- Are too big to effectively penetrate the deeper layers of the skin.
- Can merely provide good hydrating capabilities and not much more than that.
- Can not successfully remain micronized while sufficiently preserving their chemical characteristics; as they absorb hydration, they are unavoidably “inflated” back to their original big size upon contact with water (even after being micronized to a size of 50kDa), as early as in the manufacturing process and before being placed inside the cream.

### HAVA ZINGBOIM'S PROPHECY CREAM-OVERCOMING THE CHALLENGE:

#### (A)

It features novel multi -sized (small & big) hyaluronic acid molecules possessing intensified water absorption capabilities that allow a much more facilitated penetration deeper into all skin layers.

#### (B)

This has been successfully achieved

- **Even after** the hyaluronic acid had been dissolved in liquid during the production process.
- **Without “inflating” back to its original size or losing any of its chemical characteristics.**
- While successfully preserving **its enhanced therapeutic attributes at an optimal manner.**

#### (C)

All these accumulative, non-invasive results were achieved with NO side effects or down time periods while manifesting

- Intensified hygroscopic properties (ability to attract water) in epidermal and dermal layers.
- Increased anti oxidative abilities against the harmful effects of free radicals for a stronger barrier function and vibrant, healthy looking skin.
- Improved firmness and elasticity levels.
- Dramatically improved appearance of fine lines and wrinkles.
- Intensified effect of injectable fillers in the face and lips.
- Recovered clinical manifestations of other skin concerns.

#### (D) ELABORATION:

These enhanced water attracting and free radicals scavenging capabilities are

- **“Plumping-up”** the appearance of fine lines and medium to deep wrinkles.

HAVA ZINGBOIM  
cosmeceuticals

- **Intensifying and maintaining** the effect achieved by various injection fillers or any other “Skin Booster” techniques in the face and lips while ensuring that the ENTIRE FACE is fresh and youthful( not just the injected areas).
- **Diminishing** loss of hydration from within the skin to the environment (trans epidermal water loss). Ensuring optimal water-content balance (Homeostasis) by attracting water molecules and “inflating” upon contact with them. The skin's texture and overall complexion is healthy, smooth, well moisturized and radiant.
- **Strengthening** the skin's barrier function and supporting its immune responses throughout its efforts to protect itself against external and internal aggressors.
- **Reinforcing** the skin's firmness and resilience levels in the dermal layer; the Extra Cellular Matrix proteins (i.e., collagen and elastin fibers) are continuously surrounded by a well hydrated environment ensuring their proper function.
- **Accelerating** the healing process of dry, rough, photo- damaged and extra sensitive skin as well as in cases of acne and rosacea.
- **Maintaining** the integrity of cell membranes to prevent cellular water loss and overall skin dehydration.
- **Inhibiting** the severity of the destructive stages within the skin during inflammatory reactions (ECM proteins degradation).
- **Serving** as an inhibiting agent against the formation of inflammatory processes within the skin that cause ongoing oxidative stress if not addressed properly.

#### High Performance Ingredients:

All multi-sized micronized hyaluronic acid molecules have been successfully implemented and preserved in *Prophecy Cream* via its high performance and top quality ingredients that prevent aggregation (recomposition of ingredients).

**-Three types of oils-** *Prophecy Cream* is dominated by an oily phase as it contains three types of oils as major inhibitors of particle aggregation.

**-Sodium PCA-** “joins” all micronized HA molecules to further attract hydration.
